Bekircan Akyüz

Frontend Engineer | canakyuz.com ↗

Experienced front end software engineer focused on building accessible products for the web

Relevant Experience

Frontend Engineer TipTopJob   May 2023 — Sept 2023

- I improved website performance and user experience using HTML, CSS and JavaScript.
- Collaborated with cross-functional teams to develop scalable front-end applications and integrate with back-end systems.
- Optimized website code and documentation to improve accessibility by reducing loading speed by 30%.
- I deployed high-quality, bug-free code through extensive testing and debugging.

Frontend Engineer Remote Worker UK   Jan 2021 — Feb 2023

- I developed user-oriented web solutions with HTML, CSS, and JavaScript, prioritizing performance optimization and browser compatibility.
- I designed dynamic web applications using TypeScript, React, and Next.js.
- I optimized my development process with Docker, CI/CD, and GitHub.
- I have deployed on Vercel for rapid deployment and have experience with Git for effective team collaboration.

Frontend Engineer Hybrid Heroes   Jan 2020 — Oct 2021

- I strengthened the company's digital presence by contributing to the design and development of corporate websites.
- I prioritized the user experience that stands out with responsive designs.
- We developed interactive features in various projects using JavaScript libraries Next.js and React.

Selected Projects

AI Companion SaaS ↗

It is a web application where I can perform API integrations using Next.js and Tailwind CSS and monitor the database with Prisma.

Notion Clone Note Taking App ↗

An end-to-end full-stack application with a convenient concept style editor, cover images, nested documents, public publishing of documents, real-time database and more.

Weather App Weather API ↗

I created a weather application using Vue 3, Tailwind CSS and OpenWeather API.
